BREWBOX

BETA

welcome to your
BREWBOX

BETA

Logs fermentation temperature
& specific gravity… so you don't have to.

FEATURES

Already In Development

🌡 Live Temperature Monitoring

See live and historical temperature data throughout your fermentation.

📈 Live Sugar and %Alc.

Track sugar and alcohol concentrations over the course of fermentation.

🎛 Temperature Control

Connect your refrigeration unit to a control module. Give the BrewBox a temperature profile, and it will control the cooling system for you.

🔔 Notifications & Alarms

Know if there is a problem, without having to check. Get alerts by email or SMS.

📱 Universal Access

Connect to BrewBox using your smartphone, tablet or computer – from anywhere with internet.

☁ Cloud Backup

Never lose your data. It gets backed up in the cloud.

🔧 No Installation

BrewBox's wireless sensors float in your tank. All you have to do is clean them and drop them in. No installation required.

🎯 Scales to Your System

BrewBox works with a flexible number of sensors and control modules. So it's compatible with just about any fermentation setup.
